January 3, 2026

Abstract

Some “small” useful scripts for enhancing development or system-administrators tasks

Current version: 2026-01-03

Current number of commits: 239

Current git SHA1: b7ccfd8d0c2b08b8ce5b351b91e3e9bb18ea0788

Code lines: 6255 total lines, 5640 not empty lines, 615 empty lines.

2 Listing of files

This repository is dual licensed. All the Bash scripts source code is covered by GPLv3+. All the PHP scripts source code is covered by GPLv3+.

The text of the licenses is available at: <https://www.gnu.org/licenses/>. The git repository of this source code is also available at: <https://github.com/LLyaudet/DevOrSysAdminScripts/>.

Here is a listing of the dependencies of the code in this repository:

- The following dependencies are GPLv3+ licensed:
basename, bash (and its builtins), cat, chmod, cp, cut, date, diff, dirname, find, grep, head, mkdir, mv, realpath, rm, sed, sha512sum, shellcheck, sort, tail, wc, wget, xargs
- The following dependencies are GPLv2+ licensed:
more, pandoc, pdftex, pdflatex, tree
- The following dependencies are GPLv2 licensed:
git
- The following dependencies are LGPLv2.1+ licensed:
notify-send

- The following dependencies are MIT licensed:
black, isort, mypy
- php is licensed under PHP License v3.01
- tex is licensed under Knuth license
- pcregrep has a custom license from Cambridge University

Remark: Some commands listed under GPLv3+ are POSIX and can have different implementations under another license; for example, uutils coreutils is MIT licensed, whilst GNU coreutils is GPLv3+ licensed.

135 Here is a listing of the dependencies of the code in this repository:
136 <ul>
137 <li> The following dependencies are GPLv3+ licensed:<br>
138 basename, bash (and its builtins), cat, chmod, cp, cut, date, diff,
139 dirname, find, grep, head, mkdir, mv, realpath, rm, sed, sha512sum,
140 shellcheck, sort, tail, wc, wget, xargs
141 <li> The following dependencies are GPLv2+ licensed:<br>
142 more, pandoc, pdftex, pdflatex, tree
143 <li> The following dependencies are GPLv2 licensed:<br>
144 git
145 <li> The following dependencies are LGPLv2.1+ licensed:<br>
146 notify-send
147 <li> The following dependencies are MIT licensed:<br>
148 black, isort, mypy
149 <li> php is licensed under PHP License v3.01
150 <li> tex is licensed under Knuth license
151 <li> pcregrep has a custom license from Cambridge University
152 </ul>
153 </p>
154
155 <p>
156 Remark: Some commands listed under GPLv3+ are POSIX
157 and can have different implementations under another license;
158 for example, uutils coreutils is MIT licensed,
159 whilst GNU coreutils is GPLv3+ licensed.

1 This repository is dual licensed.
2 All the Bash scripts source code is covered by GPLv3+.
3 All the PHP scripts source code is covered by LGPLv3+.
4
5 Here is a listing of the dependencies of the code in this repository:
6 - The following dependencies are GPLv3+ licensed:
7 basename, bash (and its builtins), cat, chmod, cp, cut, date, diff,
8 dirname, find, grep, head, mkdir, mv, realpath, rm, sed, sha512sum,
9 shellcheck, sort, tail, wc, wget, xargs
10 - The following dependencies are GPLv2+ licensed:
11 more, pandoc, pdftex, pdflatex, tree
12 - The following dependencies are GPLv2 licensed:
13 git
14 - The following dependencies are LGPLv2.1+ licensed:
15 notify-send
16 - The following dependencies are MIT licensed:
17 black, isort, mypy
18 - php is licensed under PHP License v3.01

```

```

19 - tex is licensed under Knuth license
20 - pcregrep has a custom license from Cambridge University
21
22 Remark: Some commands listed under GPLv3+ are POSIX
23 and can have different implementations under another license;
24 for example, uutils coreutils is MIT licensed,
25 whilst GNU coreutils is GPLv3+ licensed.

2.48 COPYING

```

1          GNU GENERAL PUBLIC LICENSE
2          Version 3, 29 June 2007
3
4  Copyright (C) 2007 Free Software Foundation, Inc. <https://fsf.org/>
5  Everyone is permitted to copy and distribute verbatim copies
6  of this license document, but changing it is not allowed.
7
8          Preamble
9
10         The GNU General Public License is a free, copyleft license for
11         software and other kinds of works.
12
13         The licenses for most software and other practical works are designed
14         to take away your freedom to share and change the works. By contrast,
15         the GNU General Public License is intended to guarantee your freedom to
16         share and change all versions of a program--to make sure it remains free
17         software for all its users. We, the Free Software Foundation, use the
18         GNU General Public License for most of our software; it applies also to
19         any other work released this way by its authors. You can apply it to
20         your programs, too.
21
22         When we speak of free software, we are referring to freedom, not
23         price. Our General Public Licenses are designed to make sure that you
24         have the freedom to distribute copies of free software (and charge for
25         them if you wish), that you receive source code or can get it if you
26         want it, that you can change the software or use pieces of it in new
27         free programs, and that you know you can do these things.

```

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

74 "This License" refers to version 3 of the GNU General Public License.
75
76 "Copyright" also means copyright-like laws that apply to other kinds of
77 works, such as semiconductor masks.
78
79 "The Program" refers to any copyrightable work licensed under this
80 License. Each licensee is addressed as "you". "Licensees" and
81 "recipients" may be individuals or organizations.
82
83 To "modify" a work means to copy from or adapt all or part of the work
84 in a fashion requiring copyright permission, other than the making of an
85 exact copy. The resulting work is called a "modified version" of the
86 earlier work or a work "based on" the earlier work.
87
88 A "covered work" means either the unmodified Program or a work based
89 on the Program.
90
91 To "propagate" a work means to do anything with it that, without
92 permission, would make you directly or secondarily liable for
93 infringement under applicable copyright law, except executing it on a
94 computer or modifying a private copy. Propagation includes copying,
95 distribution (with or without modification), making available to the
96 public, and in some countries other activities as well.
97
98 To "convey" a work means any kind of propagation that enables other
99 parties to make or receive copies. Mere interaction with a user through
100 a computer network, with no transfer of a copy, is not conveying.
101
102 An interactive user interface displays "Appropriate Legal Notices"
103 to the extent that it includes a convenient and prominently visible
104 feature that (1) displays an appropriate copyright notice, and (2)
105 tells the user that there is no warranty for the work (except to the
106 extent that warranties are provided), that licensees may convey the
107 work under this License, and how to view a copy of this License. If
108 the interface presents a list of user commands or options, such as a
109 menu, a prominent item in the list meets this criterion.
110
111 1. Source Code.
112
113 The "source code" for a work means the preferred form of the work
114 for making modifications to it. "Object code" means any non-source
115 form of a work.
116
117 A "Standard Interface" means an interface that either is an official
118 standard defined by a recognized standards body, or, in the case of

120 interfaces specified for a particular programming language, one that
121 is widely used among developers working in that language.

122

123 The "System Libraries" of an executable work include anything, other
124 than the work as a whole, that (a) is included in the normal form of
125 packaging a Major Component, but which is not part of that Major
126 Component, and (b) serves only to enable use of the work with that
127 Major Component, or to implement a Standard Interface for which an
128 implementation is available to the public in source code form. A
129 "Major Component", in this context, means a major essential component
130 (kernel, window system, and so on) of the specific operating system
131 (if any) on which the executable work runs, or a compiler used to
132 produce the work, or an object code interpreter used to run it.

133

134 The "Corresponding Source" for a work in object code form means all
135 the source code needed to generate, install, and (for an executable
136 work) run the object code and to modify the work, including scripts to
137 control those activities. However, it does not include the work's
138 System Libraries, or general-purpose tools or generally available free
139 programs which are used unmodified in performing those activities but
140 which are not part of the work. For example, Corresponding Source
141 includes interface definition files associated with source files for
142 the work, and the source code for shared libraries and dynamically
143 linked subprograms that the work is specifically designed to require,
144 such as by intimate data communication or control flow between those
145 subprograms and other parts of the work.

146

147 The Corresponding Source need not include anything that users
148 can regenerate automatically from other parts of the Corresponding
149 Source.

150

151 The Corresponding Source for a work in source code form is that
152 same work.

153

154 2. Basic Permissions.

155

156 All rights granted under this License are granted for the term of
157 copyright on the Program, and are irrevocable provided the stated
158 conditions are met. This License explicitly affirms your unlimited
159 permission to run the unmodified Program. The output from running a
160 covered work is covered by this License only if the output, given its
161 content, constitutes a covered work. This License acknowledges your
162 rights of fair use or other equivalent, as provided by copyright law.

163

164 You may make, run and propagate covered works that you do not
165 convey, without conditions so long as your license otherwise remains

166 in force. You may convey covered works to others for the sole purpose
167 of having them make modifications exclusively for you, or provide you
168 with facilities for running those works, provided that you comply with
169 the terms of this License in conveying all material for which you do
170 not control copyright. Those thus making or running the covered works
171 for you must do so exclusively on your behalf, under your direction
172 and control, on terms that prohibit them from making any copies of
173 your copyrighted material outside their relationship with you.

174

175 Conveying under any other circumstances is permitted solely under
176 the conditions stated below. Sublicensing is not allowed; section 10
177 makes it unnecessary.

178

179 3. Protecting Users' Legal Rights From Anti-Circumvention Law.

180

181 No covered work shall be deemed part of an effective technological
182 measure under any applicable law fulfilling obligations under article
183 11 of the WIPO copyright treaty adopted on 20 December 1996, or
184 similar laws prohibiting or restricting circumvention of such
185 measures.

186

187 When you convey a covered work, you waive any legal power to forbid
188 circumvention of technological measures to the extent such circumvention
189 is effected by exercising rights under this License with respect to
190 the covered work, and you disclaim any intention to limit operation or
191 modification of the work as a means of enforcing, against the work's
192 users, your or third parties' legal rights to forbid circumvention of
193 technological measures.

194

195 4. Conveying Verbatim Copies.

196

197 You may convey verbatim copies of the Program's source code as you
198 receive it, in any medium, provided that you conspicuously and
199 appropriately publish on each copy an appropriate copyright notice;
200 keep intact all notices stating that this License and any
201 non-permissive terms added in accord with section 7 apply to the code;
202 keep intact all notices of the absence of any warranty; and give all
203 recipients a copy of this License along with the Program.

204

205 You may charge any price or no price for each copy that you convey,
206 and you may offer support or warranty protection for a fee.

207

208 5. Conveying Modified Source Versions.

209

210 You may convey a work based on the Program, or the modifications to
211 produce it from the Program, in the form of source code under the

212 terms of section 4, provided that you also meet all of these conditions:

213

214 a) The work must carry prominent notices stating that you modified
215 it, and giving a relevant date.

216

217 b) The work must carry prominent notices stating that it is
218 released under this License and any conditions added under section
219 7. This requirement modifies the requirement in section 4 to
220 "keep intact all notices".

221

222 c) You must license the entire work, as a whole, under this
223 License to anyone who comes into possession of a copy. This
224 License will therefore apply, along with any applicable section 7
225 additional terms, to the whole of the work, and all its parts,
226 regardless of how they are packaged. This License gives no
227 permission to license the work in any other way, but it does not
228 invalidate such permission if you have separately received it.

229

230 d) If the work has interactive user interfaces, each must display
231 Appropriate Legal Notices; however, if the Program has interactive
232 interfaces that do not display Appropriate Legal Notices, your
233 work need not make them do so.

234

235 A compilation of a covered work with other separate and independent
236 works, which are not by their nature extensions of the covered work,
237 and which are not combined with it such as to form a larger program,
238 in or on a volume of a storage or distribution medium, is called an
239 "aggregate" if the compilation and its resulting copyright are not
240 used to limit the access or legal rights of the compilation's users
241 beyond what the individual works permit. Inclusion of a covered work
242 in an aggregate does not cause this License to apply to the other
243 parts of the aggregate.

244

245 6. Conveying Non-Source Forms.

246

247 You may convey a covered work in object code form under the terms
248 of sections 4 and 5, provided that you also convey the
249 machine-readable Corresponding Source under the terms of this License,
250 in one of these ways:

251

252 a) Convey the object code in, or embodied in, a physical product
253 (including a physical distribution medium), accompanied by the
254 Corresponding Source fixed on a durable physical medium
255 customarily used for software interchange.

256

257 b) Convey the object code in, or embodied in, a physical product

258 (including a physical distribution medium), accompanied by a
259 written offer, valid for at least three years and valid for as
260 long as you offer spare parts or customer support for that product
261 model, to give anyone who possesses the object code either (1) a
262 copy of the Corresponding Source for all the software in the
263 product that is covered by this License, on a durable physical
264 medium customarily used for software interchange, for a price no
265 more than your reasonable cost of physically performing this
266 conveying of source, or (2) access to copy the
267 Corresponding Source from a network server at no charge.

268
269 c) Convey individual copies of the object code with a copy of the
270 written offer to provide the Corresponding Source. This
271 alternative is allowed only occasionally and noncommercially, and
272 only if you received the object code with such an offer, in accord
273 with subsection 6b.

274
275 d) Convey the object code by offering access from a designated
276 place (gratis or for a charge), and offer equivalent access to the
277 Corresponding Source in the same way through the same place at no
278 further charge. You need not require recipients to copy the
279 Corresponding Source along with the object code. If the place to
280 copy the object code is a network server, the Corresponding Source
281 may be on a different server (operated by you or a third party)
282 that supports equivalent copying facilities, provided you maintain
283 clear directions next to the object code saying where to find the
284 Corresponding Source. Regardless of what server hosts the
285 Corresponding Source, you remain obligated to ensure that it is
286 available for as long as needed to satisfy these requirements.

287
288 e) Convey the object code using peer-to-peer transmission, provided
289 you inform other peers where the object code and Corresponding
290 Source of the work are being offered to the general public at no
291 charge under subsection 6d.

292 A separable portion of the object code, whose source code is excluded
293 from the Corresponding Source as a System Library, need not be
294 included in conveying the object code work.

295
296 A "User Product" is either (1) a "consumer product", which means any
297 tangible personal property which is normally used for personal, family,
298 or household purposes, or (2) anything designed or sold for incorporation
299 into a dwelling. In determining whether a product is a consumer product,
300 doubtful cases shall be resolved in favor of coverage. For a particular
301 product received by a particular user, "normally used" refers to a
302 typical or common use of that class of product, regardless of the status

304 of the particular user or of the way in which the particular user
305 actually uses, or expects or is expected to use, the product. A product
306 is a consumer product regardless of whether the product has substantial
307 commercial, industrial or non-consumer uses, unless such uses represent
308 the only significant mode of use of the product.

309
310 "Installation Information" for a User Product means any methods,
311 procedures, authorization keys, or other information required to install
312 and execute modified versions of a covered work in that User Product from
313 a modified version of its Corresponding Source. The information must
314 suffice to ensure that the continued functioning of the modified object
315 code is in no case prevented or interfered with solely because
316 modification has been made.

317
318 If you convey an object code work under this section in, or with, or
319 specifically for use in, a User Product, and the conveying occurs as
320 part of a transaction in which the right of possession and use of the
321 User Product is transferred to the recipient in perpetuity or for a
322 fixed term (regardless of how the transaction is characterized), the
323 Corresponding Source conveyed under this section must be accompanied
324 by the Installation Information. But this requirement does not apply
325 if neither you nor any third party retains the ability to install
326 modified object code on the User Product (for example, the work has
327 been installed in ROM).

328
329 The requirement to provide Installation Information does not include a
330 requirement to continue to provide support service, warranty, or updates
331 for a work that has been modified or installed by the recipient, or for
332 the User Product in which it has been modified or installed. Access to a
333 network may be denied when the modification itself materially and
334 adversely affects the operation of the network or violates the rules and
335 protocols for communication across the network.

336
337 Corresponding Source conveyed, and Installation Information provided,
338 in accord with this section must be in a format that is publicly
339 documented (and with an implementation available to the public in
340 source code form), and must require no special password or key for
341 unpacking, reading or copying.

342
343 7. Additional Terms.

344
345 "Additional permissions" are terms that supplement the terms of this
346 License by making exceptions from one or more of its conditions.
347 Additional permissions that are applicable to the entire Program shall
348 be treated as though they were included in this License, to the extent
349 that they are valid under applicable law. If additional permissions

350 apply only to part of the Program, that part may be used separately
351 under those permissions, but the entire Program remains governed by
352 this License without regard to the additional permissions.

353
354 When you convey a copy of a covered work, you may at your option
355 remove any additional permissions from that copy, or from any part of
356 it. (Additional permissions may be written to require their own
357 removal in certain cases when you modify the work.) You may place
358 additional permissions on material, added by you to a covered work,
359 for which you have or can give appropriate copyright permission.

360
361 Notwithstanding any other provision of this License, for material you
362 add to a covered work, you may (if authorized by the copyright holders of
363 that material) supplement the terms of this License with terms:

- 364
365 a) Disclaiming warranty or limiting liability differently from the
366 terms of sections 15 and 16 of this License; or
367
368 b) Requiring preservation of specified reasonable legal notices or
369 author attributions in that material or in the Appropriate Legal
370 Notices displayed by works containing it; or
371
372 c) Prohibiting misrepresentation of the origin of that material, or
373 requiring that modified versions of such material be marked in
374 reasonable ways as different from the original version; or
375
376 d) Limiting the use for publicity purposes of names of licensors or
377 authors of the material; or
378
379 e) Declining to grant rights under trademark law for use of some
380 trade names, trademarks, or service marks; or
381
382 f) Requiring indemnification of licensors and authors of that
383 material by anyone who conveys the material (or modified versions of
384 it) with contractual assumptions of liability to the recipient, for
385 any liability that these contractual assumptions directly impose on
386 those licensors and authors.

387
388 All other non-permissive additional terms are considered "further
389 restrictions" within the meaning of section 10. If the Program as you
390 received it, or any part of it, contains a notice stating that it is
391 governed by this License along with a term that is a further
392 restriction, you may remove that term. If a license document contains
393 a further restriction but permits relicensing or conveying under this
394 License, you may add to a covered work material governed by the terms
395 of that license document, provided that the further restriction does

396 not survive such relicensing or conveying.

397

398 If you add terms to a covered work in accord with this section, you
399 must place, in the relevant source files, a statement of the
400 additional terms that apply to those files, or a notice indicating
401 where to find the applicable terms.

402

403 Additional terms, permissive or non-permissive, may be stated in the
404 form of a separately written license, or stated as exceptions;
405 the above requirements apply either way.

406

407 8. Termination.

408

409 You may not propagate or modify a covered work except as expressly
410 provided under this License. Any attempt otherwise to propagate or
411 modify it is void, and will automatically terminate your rights under
412 this License (including any patent licenses granted under the third
413 paragraph of section 11).

414

415 However, if you cease all violation of this License, then your
416 license from a particular copyright holder is reinstated (a)
417 provisionally, unless and until the copyright holder explicitly and
418 finally terminates your license, and (b) permanently, if the copyright
419 holder fails to notify you of the violation by some reasonable means
420 prior to 60 days after the cessation.

421

422 Moreover, your license from a particular copyright holder is
423 reinstated permanently if the copyright holder notifies you of the
424 violation by some reasonable means, this is the first time you have
425 received notice of violation of this License (for any work) from that
426 copyright holder, and you cure the violation prior to 30 days after
427 your receipt of the notice.

428

429 Termination of your rights under this section does not terminate the
430 licenses of parties who have received copies or rights from you under
431 this License. If your rights have been terminated and not permanently
432 reinstated, you do not qualify to receive new licenses for the same
433 material under section 10.

434

435 9. Acceptance Not Required for Having Copies.

436

437 You are not required to accept this License in order to receive or
438 run a copy of the Program. Ancillary propagation of a covered work
439 occurring solely as a consequence of using peer-to-peer transmission
440 to receive a copy likewise does not require acceptance. However,
441 nothing other than this License grants you permission to propagate or

442 modify any covered work. These actions infringe copyright if you do
443 not accept this License. Therefore, by modifying or propagating a
444 covered work, you indicate your acceptance of this License to do so.

445

446 10. Automatic Licensing of Downstream Recipients.

447

448 Each time you convey a covered work, the recipient automatically
449 receives a license from the original licensors, to run, modify and
450 propagate that work, subject to this License. You are not responsible
451 for enforcing compliance by third parties with this License.

452

453 An "entity transaction" is a transaction transferring control of an
454 organization, or substantially all assets of one, or subdividing an
455 organization, or merging organizations. If propagation of a covered
456 work results from an entity transaction, each party to that
457 transaction who receives a copy of the work also receives whatever
458 licenses to the work the party's predecessor in interest had or could
459 give under the previous paragraph, plus a right to possession of the
460 Corresponding Source of the work from the predecessor in interest, if
461 the predecessor has it or can get it with reasonable efforts.

462

463 You may not impose any further restrictions on the exercise of the
464 rights granted or affirmed under this License. For example, you may
465 not impose a license fee, royalty, or other charge for exercise of
466 rights granted under this License, and you may not initiate litigation
467 (including a cross-claim or counterclaim in a lawsuit) alleging that
468 any patent claim is infringed by making, using, selling, offering for
469 sale, or importing the Program or any portion of it.

470

471 11. Patents.

472

473 A "contributor" is a copyright holder who authorizes use under this
474 License of the Program or a work on which the Program is based. The
475 work thus licensed is called the contributor's "contributor version".

476

477 A contributor's "essential patent claims" are all patent claims
478 owned or controlled by the contributor, whether already acquired or
479 hereafter acquired, that would be infringed by some manner, permitted
480 by this License, of making, using, or selling its contributor version,
481 but do not include claims that would be infringed only as a
482 consequence of further modification of the contributor version. For
483 purposes of this definition, "control" includes the right to grant
484 patent sublicenses in a manner consistent with the requirements of
485 this License.

486

487 Each contributor grants you a non-exclusive, worldwide, royalty-free

488 patent license under the contributor's essential patent claims, to
489 make, use, sell, offer for sale, import and otherwise run, modify and
490 propagate the contents of its contributor version.

491
492 In the following three paragraphs, a "patent license" is any express
493 agreement or commitment, however denominated, not to enforce a patent
494 (such as an express permission to practice a patent or covenant not to
495 sue for patent infringement). To "grant" such a patent license to a
496 party means to make such an agreement or commitment not to enforce a
497 patent against the party.

498
499 If you convey a covered work, knowingly relying on a patent license,
500 and the Corresponding Source of the work is not available for anyone
501 to copy, free of charge and under the terms of this License, through a
502 publicly available network server or other readily accessible means,
503 then you must either (1) cause the Corresponding Source to be so
504 available, or (2) arrange to deprive yourself of the benefit of the
505 patent license for this particular work, or (3) arrange, in a manner
506 consistent with the requirements of this License, to extend the patent
507 license to downstream recipients. "Knowingly relying" means you have
508 actual knowledge that, but for the patent license, your conveying the
509 covered work in a country, or your recipient's use of the covered work
510 in a country, would infringe one or more identifiable patents in that
511 country that you have reason to believe are valid.

512
513 If, pursuant to or in connection with a single transaction or
514 arrangement, you convey, or propagate by procuring conveyance of, a
515 covered work, and grant a patent license to some of the parties
516 receiving the covered work authorizing them to use, propagate, modify
517 or convey a specific copy of the covered work, then the patent license
518 you grant is automatically extended to all recipients of the covered
519 work and works based on it.

520
521 A patent license is "discriminatory" if it does not include within
522 the scope of its coverage, prohibits the exercise of, or is
523 conditioned on the non-exercise of one or more of the rights that are
524 specifically granted under this License. You may not convey a covered
525 work if you are a party to an arrangement with a third party that is
526 in the business of distributing software, under which you make payment
527 to the third party based on the extent of your activity of conveying
528 the work, and under which the third party grants, to any of the
529 parties who would receive the covered work from you, a discriminatory
530 patent license (a) in connection with copies of the covered work
531 conveyed by you (or copies made from those copies), or (b) primarily
532 for and in connection with specific products or compilations that
533 contain the covered work, unless you entered into that arrangement,

534 or that patent license was granted, prior to 28 March 2007.

535
536 Nothing in this License shall be construed as excluding or limiting
537 any implied license or other defenses to infringement that may
538 otherwise be available to you under applicable patent law.

539
540 12. No Surrender of Others' Freedom.

541
542 If conditions are imposed on you (whether by court order, agreement or
543 otherwise) that contradict the conditions of this License, they do not
544 excuse you from the conditions of this License. If you cannot convey a
545 covered work so as to satisfy simultaneously your obligations under this
546 License and any other pertinent obligations, then as a consequence you may
547 not convey it at all. For example, if you agree to terms that obligate you
548 to collect a royalty for further conveying from those to whom you convey
549 the Program, the only way you could satisfy both those terms and this
550 License would be to refrain entirely from conveying the Program.

551
552 13. Use with the GNU Affero General Public License.

553
554 Notwithstanding any other provision of this License, you have
555 permission to link or combine any covered work with a work licensed
556 under version 3 of the GNU Affero General Public License into a single
557 combined work, and to convey the resulting work. The terms of this
558 License will continue to apply to the part which is the covered work,
559 but the special requirements of the GNU Affero General Public License,
560 section 13, concerning interaction through a network will apply to the
561 combination as such.

562
563 14. Revised Versions of this License.

564
565 The Free Software Foundation may publish revised and/or new versions of
566 the GNU General Public License from time to time. Such new versions will
567 be similar in spirit to the present version, but may differ in detail to
568 address new problems or concerns.

569
570 Each version is given a distinguishing version number. If the
571 Program specifies that a certain numbered version of the GNU General
572 Public License "or any later version" applies to it, you have the
573 option of following the terms and conditions either of that numbered
574 version or of any later version published by the Free Software
575 Foundation. If the Program does not specify a version number of the
576 GNU General Public License, you may choose any version ever published
577 by the Free Software Foundation.

578
579 If the Program specifies that a proxy can decide which future

580 versions of the GNU General Public License can be used, that proxy's
581 public statement of acceptance of a version permanently authorizes you
582 to choose that version for the Program.

583

584 Later license versions may give you additional or different
585 permissions. However, no additional obligations are imposed on any
586 author or copyright holder as a result of your choosing to follow a
587 later version.

588

589 15. Disclaimer of Warranty.

590

591 THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY
592 APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT
593 HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY
594 OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO,
595 THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR
596 PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM
597 IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF
598 ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

599

600 16. Limitation of Liability.

601

602 IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING
603 WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS
604 THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY
605 GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE
606 USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF
607 DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD
608 PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS),
609 EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF
610 SUCH DAMAGES.

611

612 17. Interpretation of Sections 15 and 16.

613

614 If the disclaimer of warranty and limitation of liability provided
615 above cannot be given local legal effect according to their terms,
616 reviewing courts shall apply local law that most closely approximates
617 an absolute waiver of all civil liability in connection with the
618 Program, unless a warranty or assumption of liability accompanies a
619 copy of the Program in return for a fee.

620

621 END OF TERMS AND CONDITIONS

622

623 How to Apply These Terms to Your New Programs

624

625 If you develop a new program, and you want it to be of the greatest

626 possible use to the public, the best way to achieve this is to make it
627 free software which everyone can redistribute and change under these terms.
628

629 To do so, attach the following notices to the program. It is safest
630 to attach them to the start of each source file to most effectively
631 state the exclusion of warranty; and each file should have at least
632 the "copyright" line and a pointer to where the full notice is found.
633

634 <one line to give the program's name and a brief idea of what it does.>
635 Copyright (C) <year> <name of author>
636

637 This program is free software: you can redistribute it and/or modify
638 it under the terms of the GNU General Public License as published by
639 the Free Software Foundation, either version 3 of the License, or
640 (at your option) any later version.
641

642 This program is distributed in the hope that it will be useful,
643 but WITHOUT ANY WARRANTY; without even the implied warranty of
644 MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
645 GNU General Public License for more details.
646

647 You should have received a copy of the GNU General Public License
648 along with this program. If not, see <<https://www.gnu.org/licenses/>>.
649

650 Also add information on how to contact you by electronic and paper mail.
651

652 If the program does terminal interaction, make it output a short
653 notice like this when it starts in an interactive mode:
654

655 <program> Copyright (C) <year> <name of author>
656 This program comes with ABSOLUTELY NO WARRANTY; for details type 'show w'.
657 This is free software, and you are welcome to redistribute it
658 under certain conditions; type 'show c' for details.
659

660 The hypothetical commands 'show w' and 'show c' should show the appropriate
661 parts of the General Public License. Of course, your program's commands
662 might be different; for a GUI interface, you would use an "about box".
663

664 You should also get your employer (if you work as a programmer) or school,
665 if any, to sign a "copyright disclaimer" for the program, if necessary.
666 For more information on this, and how to apply and follow the GNU GPL, see
667 <<https://www.gnu.org/licenses/>>.
668

669 The GNU General Public License does not permit incorporating your program
670 into proprietary programs. If your program is a subroutine library, you
671 may consider it more useful to permit linking proprietary applications with

the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <<https://www.gnu.org/licenses/why-not-lgpl.html>>.

2.49 COPYING.LESSER

41
42 1. Exception to Section 3 of the GNU GPL.
43
44 You may convey a covered work under sections 3 and 4 of this License
45 without being bound by section 3 of the GNU GPL.
46
47 2. Conveying Modified Versions.
48
49 If you modify a copy of the Library, and, in your modifications, a
50 facility refers to a function or data to be supplied by an Application
51 that uses the facility (other than as an argument passed when the
52 facility is invoked), then you may convey a copy of the modified
53 version:
54
55 a) under this License, provided that you make a good faith effort to
56 ensure that, in the event an Application does not supply the
57 function or data, the facility still operates, and performs
58 whatever part of its purpose remains meaningful, or
59
60 b) under the GNU GPL, with none of the additional permissions of
61 this License applicable to that copy.
62
63 3. Object Code Incorporating Material from Library Header Files.
64
65 The object code form of an Application may incorporate material from
66 a header file that is part of the Library. You may convey such object
67 code under terms of your choice, provided that, if the incorporated
68 material is not limited to numerical parameters, data structure
69 layouts and accessors, or small macros, inline functions and templates
70 (ten or fewer lines in length), you do both of the following:
71
72 a) Give prominent notice with each copy of the object code that the
73 Library is used in it and that the Library and its use are
74 covered by this License.
75
76 b) Accompany the object code with a copy of the GNU GPL and this license
77 document.
78
79 4. Combined Works.
80
81 You may convey a Combined Work under terms of your choice that,
82 taken together, effectively do not restrict modification of the
83 portions of the Library contained in the Combined Work and reverse
84 engineering for debugging such modifications, if you also do each of
85 the following:
86

- 87 a) Give prominent notice with each copy of the Combined Work that
88 the Library is used in it and that the Library and its use are
89 covered by this License.
- 90 b) Accompany the Combined Work with a copy of the GNU GPL and this license
91 document.
- 93 c) For a Combined Work that displays copyright notices during
94 execution, include the copyright notice for the Library among
95 these notices, as well as a reference directing the user to the
96 copies of the GNU GPL and this license document.
- 98 d) Do one of the following:
- 100 0) Convey the Minimal Corresponding Source under the terms of this
101 License, and the Corresponding Application Code in a form
102 suitable for, and under terms that permit, the user to
103 recombine or relink the Application with a modified version of
104 the Linked Version to produce a modified Combined Work, in the
105 manner specified by section 6 of the GNU GPL for conveying
106 Corresponding Source.
- 108 1) Use a suitable shared library mechanism for linking with the
109 Library. A suitable mechanism is one that (a) uses at run time
110 a copy of the Library already present on the user's computer
111 system, and (b) will operate properly with a modified version
112 of the Library that is interface-compatible with the Linked
113 Version.
- 115 e) Provide Installation Information, but only if you would otherwise
116 be required to provide such information under section 6 of the
117 GNU GPL, and only to the extent that such information is
118 necessary to install and execute a modified version of the
119 Combined Work produced by recombining or relinking the
120 Application with a modified version of the Linked Version. (If
121 you use option 4d0, the Installation Information must accompany
122 the Minimal Corresponding Source and Corresponding Application
123 Code. If you use option 4d1, you must provide the Installation
124 Information in the manner specified by section 6 of the GNU GPL
125 for conveying Corresponding Source.)
- 127 5. Combined Libraries.
- 129 130 You may place library facilities that are a work based on the
131 Library side by side in a single library together with other library
132 facilities that are not Applications and are not covered by this

133 License, and convey such a combined library under terms of your
134 choice, if you do both of the following:

135

136 a) Accompany the combined library with a copy of the same work based
137 on the Library, uncombined with any other library facilities,
138 conveyed under the terms of this License.

139

140 b) Give prominent notice with the combined library that part of it
141 is a work based on the Library, and explaining where to find the
142 accompanying uncombined form of the same work.

143

144 6. Revised Versions of the GNU Lesser General Public License.

145

146 The Free Software Foundation may publish revised and/or new versions
147 of the GNU Lesser General Public License from time to time. Such new
148 versions will be similar in spirit to the present version, but may
149 differ in detail to address new problems or concerns.

150

151 Each version is given a distinguishing version number. If the
152 Library as you received it specifies that a certain numbered version
153 of the GNU Lesser General Public License "or any later version"
154 applies to it, you have the option of following the terms and
155 conditions either of that published version or of any later version
156 published by the Free Software Foundation. If the Library as you
157 received it does not specify a version number of the GNU Lesser
158 General Public License, you may choose any version of the GNU Lesser
159 General Public License ever published by the Free Software Foundation.

160

161 If the Library as you received it specifies that a proxy can decide
162 whether future versions of the GNU Lesser General Public License shall
163 apply, that proxy's public statement of acceptance of any version is
164 permanent authorization for you to choose that version for the
165 Library.

7
8 |           **Some "small" useful scripts**          |
9 |:-----:|
10| **for enhancing development or system-administrators tasks** |
11
12 Currently, the biggest part of this repository is in
13 a suite of shell scripts about build and checks that
14 I use in some of my other repositories.
15
16 I tried to follow some conventions for my bash code:
17
18 - I tried to encapsulate most of the code in functions.
19 - Unless used as return values, variables in functions are defined
20   as local variables ('local' keyword or 'declare')
21   with prefix "LFBFL_".
22 - When used as return values, variables in functions are defined
23   as global variables ('declare -g') with prefix
24   "@function_name@_result_".
25 - Whenever a variable is no more modified after some point,
26   add the keyword 'readonly' or use 'declare -r'.
27 - Whenever a variable will only contain integer values (or boolean
28   values as 0 or 1), use 'declare -i'.
29 - I named bash files with suffixes ".exec.sh" when the script can
30   be runned
31   (executable, abbreviation stops before a vowel).
32 - I named bash files with suffixes ".libr.sh" when the script contains
33   only functions definitions
34   (library, abbreviation stops before a vowel).
35 - When some ".exec.sh" code is encapsulated into functions,
36   either these functions can be reused and go in some ".libr.sh" file,
37   either they are truly specific to this script and they are kept
38   in ".exec.sh" file.
39
40 But the files "pre-commit" and "post-commit" were not renamed,
41 since it is not possible to give them other names to use them as
42 pre-commit/post-commit hooks in 'git'.
